

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of the Claims:

Claims 1-10 (cancelled)

Claim 11 (new): A fountain pump comprising:

a housing for a pumping device, the housing having a housing wall constructed as a filter through which water can flow into the housing;

a first outlet through which water can be pumped out of the housing; and

at least one additional filter element which is detachably mounted to the housing.

Claim 12 (new): The fountain pump of claim 11 wherein said at least one additional filter element comprises a wing-like filter element which is hinged to the housing over said wall, each said additional filter element being pivotable from a first position against said wall to a second position away from said wall.

Claim 13 (new): The fountain pump of claim 11 wherein the housing has a longitudinal axis, said wall being parallel to said longitudinal axis.

Claim 14 (new): The fountain pump of claim 13 wherein the wall comprises a pair of filter surfaces which are symmetric to the longitudinal axis.

Claim 15 (new): The fountain pump of claim 14 wherein said at least one additional filter element comprises a pair of wing-like filter elements which are hinged to the housing over respective said filter surfaces, each said wing-like filter element being pivotable from a first position against said filter surface to a second position away from said filter surface.

Claim 16 (new): The fountain pump of claim 11 wherein the housing has an upper side, each said additional filter element being hinged to the upper side.

Claim 17 (new): The fountain pump of claim 11 wherein each said additional filter element has an outside filter surface and an inside filter surface.

Claim 18 (new): The fountain pump of claim 11 wherein the housing further comprises a suction connection, the fountain pump further comprising a filter connector which can be connected to said suction connection by a hose, said at least one additional filter element being connected to said filter connector.

Claim 19 (new): The fountain pump of claim 18 wherein the filter connector has a control element for adjusting a waterworks function at the outlet.

Claim 20 (new): The fountain pump of claim 11 further comprising a second outlet through which water can be pumped out of the housing.
